

Introduction to Computer Programming, Grade 11, College Preparation (ICS3C)

This course introduces students to computer programming concepts and practices. Students will write and test computer programs, using various problem-solving strategies. They will learn the fundamentals of program design and apply a software development life-cycle model to a software development project. Students will also learn about computer environments and systems, and explore environmental issues related to computers, safe computing practices, emerging technologies, and postsecondary opportunities in computer-related fields. Prerequisite: None *Elliot Lake, Korah, Michipicoten, SJD, and WC Eaket only*
